

Brass Misting Nozzles

- Machined from high quality brass with built-in stainless steel mesh screen filter
- Ideal for medium to high pressure misting applications where the water pressure is at least 100psi. Will work for low pressure misting applications but excessive dripping may occur due to low water pressure.
- Each misting nozzle has its own built-in mesh screen filter to prevent nozzle clogging
- Outlasts cheaper, inferior misting nozzles that clog quickly due to no built-in filter
- 1/8" Male NPT Pipe Thread
- Stock nozzle size is 0.63gph@40psi, 1.00gph@100psi. This size is best suited for mist cooling and dust control applications
- Brass misting nozzles are available in flow rates up to 15gph@100psi by special order. Please contact us for pricing on higher flow rate brass misting nozzles. Lead time is usually only 1 day for special order brass misting nozzles
- Also available in stainless steel by special order, typically only a 1 day lead time
